

Freelin-Wade Dental

Freelin-Wade Company sets the standard for quality plastic tubing. Add our industry leading manufacturing expertise, rapid delivery, limitless product variations, and extensive value added services and we will satisfy any of your plastic tubing requirements. Our customer service team is ready to help you find exactly the right tubing solution for your project.

Variations

If you don't see exactly what you need, then just ask us. At Freelin-Wade, we specialize in what we call "variations." We'll take our standard tubing and make the changes you need so that it's perfect for your application. We make ordering a variation easy. Ask us to create a prototype for you.

Sizes & Profiles: Virtually all of our tubing is available in metric sizes. Also, because we are a manufacturer, if there's a custom profile, size or braiding that you would like, we can make it.

Hand Piece Assemblies: We have the experience and the right equipment to fully assemble tubing with wire and our

high quality connectors.

Colors: Most of our tubing for the dental industry comes in five stock colors. What you might not know is that we can make the tubing in any color. Just provide us with a color from the Pantone®* color directory or simply send us any color swatch and we will match it.

Other popular variations are scaler assemblies, jacketed assemblies, coiling and cutting to size.
