

November 4, 2011

To Our Customer,

In response to your request for information regarding EU-Directive 2002/95/EC (RoHS), to the best of our knowledge, all Freelin-Wade tubing products, exclusive of fittings and accessories, are not intentionally manufactured or formulated with the following substances which are listed in RoHS Article 4(1):

- Lead, mercury, cadmium, Hexavalent chromium;
- Polybrominated biphenyls (PBB);
- Polybrominated Diphenyl ethers (PBDE).

Please be advised that we do not analyze for these substances.

The Commission Decision of August 18, 2005 amending the EU-Directive stated above includes the following deminimus levels:

0.1% wt in homogenous materials for lead, mercury, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ethers; 0.01% wt in homogenous materials for cadmium.

I hope that this information is helpful. If you have any further questions, please contact me.

Regards,

FREELIN-WADE CO.  
A Coilhose Pneumatics Company

Freelin-Wade Co. is not liable for consequential or other damages, including, but not limited to personal injury, damage, loss or any other expenses directly or indirectly arising from the use of, or inability to use its products, either separately or in combination with other products. All other warranties expressed or implied, whether oral or written, including but not limited to warranties for fitness or merchantability for a particular purpose are expressly excluded.
